Claim 32-39 have been canceled.

COMMENTS

Page 16, line 5 of the specification has been changed to correct a typographical error. Basis for the change is found at page 16, line 22.

As originally presented, claim 8 was directed to the inclusion of a bowl leveler. However, independent claim 1 was amended by the paper submitted on June 29, 1999, to recite "a bowl leveler connected to said process bowl for leveling said process bowl relative to said fluid reservoir." Claim 8 has been amended to be consistent with claim 1 as now written. A bowl leveler is shown in figure 8 and described at page 18, lines 1-14 of the specification. Lines 7-10 state that "The levelers may consist of jack screws threaded within the edge of module deck plate 666 and in contact with the process module frame 606 so as to elevate the process bowl assembly 603 relative to the process module 20." The structural elements shown in figure 8 are considered to represent one embodiment in which a process bowl is suspended by a bowl chassis, as recited in claim 8, to allow leveling relative to the fluid reservoir, as now recited in claim 1. In claim 8, line 1 the word "bottom" has been deleted as unnecessary since, as shown in figure 8, the bottom of the bowl is integral with the remainder of the bowl, and the whole bowl is suspended.

Line 11 of claim 16 has been amended to clarify what the fluid inlet is

between. Basis is found in originally presented claim 17. Line 14 of claim 16 referred to "said first annular space. The limitation that the first space was annular lacked antecedent basis and has been deleted. It is noted that claim 18 recites that the first space is annular in shape.

In line 4 of claim 22, the expression "said bowl cup" has been changed to --said fluid cup-- to agree with claim 21, line 4 and the wording of the other preceding claims.

Claims 32-39 have been canceled since they were directed to a nonelected invention.
